Strategic goals of IUDF

Spatial
integration

Inclusion &
access

Growth

Governance

Implementation support approach

MUNICIPALITIES	SUPPORT
Metros (8)	National Treasury (City Support Programme)
Intermediate Cities (39)	COGTA
Small towns	SALGA

ICM support programme

- The Intermediate City Municipality (ICM) Support Programme is a key programme of the IUDF
- ICMs are important contributors to the SA economy, to job creation and in accommodating increasing urbanization
- Great variation in ICMs – will need different levels of support

ICM support focus areas

- **Plan**
 - Improving integrated development planning and spatial development frameworks
- **Fund**
 - Linking sound SDF's and longer term development plans to 3- and 10- year capital expenditure frameworks (CEF)
 - Putting in place a grant framework (IUDG) which incentivizes integrated and compact development
- **Build**
 - Sustaining investment in the right places over time via better project and programme preparation and better multi-year implementation management
- **Measure**
 - Outcome focused monitoring tracks impact

Sharpening the planning tools

Outcome:

- Ensure the IUDF goals are reflected in municipal planning for urban and high density areas

Process:

- Review how IDP's can be used to achieve the goals of the IUDF and NDP.
 - Close examination of what the IUDF requires
 - Extracting what that means for IDP's or other municipal plans.
 - Review of legislation to go back and understand what was meant, what is possible and what needs changing.
- Review of some other initiatives/ guidelines to assess how they address the IUDF requirements
- Identify other development management tools which can be used by municipalities.

Output:

- New IDP guidelines – to ensure they become effective plans for implementing the IUDF

Thank You!
